Premium Laser Facial.

Our comprehensive and all-inclusive Premium Laser Facial combines the latest in laser and dermal technology to address multiple skin concerns in a single, results-driven treatment. Over the course of a full hour, your clinician tailors the treatment to your individual skin goals using a combination of pigmentation laser for laser toning and pigment spot treatments, vascular laser to target redness and broken capillaries, Laser Genesis to stimulate collagen production and improve skin quality, LED light therapy, a gentle chemical peel, diathermy (where required), and bespoke medical-grade skincare. By layering multiple treatment modalities to target different skin concerns, this premium facial delivers comprehensive skin rejuvenation, improving overall skin health, clarity, texture and radiance. It is the ultimate all-in-one treatment for achieving healthier, brighter and more youthful-looking skin.

What Can Be *Treated*?

Our Premium Laser Facial can be tailored to address a wide range of skin concerns, including:

Pigmentation and sun damage

Freckles and age spots

Melasma

Facial redness and rosacea

Broken capillaries and other benign vascular lesions (such as cherry angiomas)

Uneven skin tone

Dull, tired-looking skin

Fine lines and early signs of ageing

Enlarged pores

Rough or uneven skin texture

Acne and acne-related redness

Skin tags and selected benign skin lesions (using diathermy where appropriate)

Overall skin rejuvenation and collagen stimulation

Recommended *Treatment Plan.*

For optimal results, we generally recommend a course of 3 treatments, spaced 4-8 weeks apart, depending on your skin concerns and desired outcome.

Many clients notice brighter, smoother, more radiant skin after just one treatment, with continued improvements in pigmentation, redness, collagen production and overall skin quality developing over the following weeks. Maintenance treatments every 3-6 months are recommended to maintain long-term results.

RECOVERY TIME

The Premium Laser Facial involves downtime that is tailored to your individual treatment plan and will depend on the specific modalities used and the intensity of your treatment. You may experience mild redness and warmth immediately after treatment, similar to a light sunburn, which typically settles within 24-48 hours. If pigmentation or vascular lesions are treated, temporary darkening of pigment or mild swelling may occur before gradually resolving over the following 7-14 days.

Following treatment, it is important to avoid excessive sun exposure, heat, vigorous exercise and active skincare products as advised by your clinician. Daily sunscreen application is essential to protect your results.

To help you achieve the best possible outcome, your clinician will provide personalised aftercare instructions before your treatment. Comprehensive aftercare information can also be provided ahead of your appointment if desired.
