Skin Needling.

Skin Needling, also known as Collagen Induction Therapy, is a minimally invasive treatment that creates thousands of tiny micro-channels in the skin to stimulate your body's natural healing response. This process encourages collagen and elastin production, helping to improve acne scarring, enlarged pores, fine lines, wrinkles, uneven texture, surgical scars, and overall skin quality.

BENEFITS

IMPROVES SKIN TEXTURE, FIRMNESS, AND OVERALL SKIN QUALITY

MINIMISES THE APPEARANCE OF FINE LINES, WRINKLES AND ENLARGED PORES

REDUCES THE APPEARANCE OF ACNE SCARS AND TEXTURAL IRREGULARITIES

GET IN TOUCH

Skin Needling *with infusions.*

We also offer advanced skin needling infusions, which are sterile, medical-grade gel formulations enriched with targeted nutrients, peptides, antioxidants and minerals which are delivered deeper into the skin during treatment to enhance hydration, brightening, and overall rejuvenation for even more optimised results. Rather than a “one-size-fits-all” approach, infusions allow us to tailor your skin needling treatment to your unique skin concerns.

INFUSION MENU

EVENTONE

Targets pigmentation, dark spots and uneven skin tone to restore clarity and radiance.

FINE-LINE PEPTIDE

Supports collagen production and skin density to soften fine lines and improve firmness.

COLLAGEN-BOOST

Focuses on elasticity and structural support to create smoother, plumper, more youthful-looking skin.

NCTF

A multi-corrective “skin multivitamin” infusion that deeply hydrates, enhances recovery and boosts overall luminosity.

Please note: Your Dermal Therapist will assess your skin at your appointment and recommend the most suitable infusion based on your individual skin concerns and treatment goals.

GET IN TOUCH

Recommended *Treatment Plan.*

For best results, we typically recommend a course of 3–6 treatments, spaced approximately 4–6 weeks apart, depending on your skin concerns and treatment goals. Many clients notice an improvement in skin texture and radiance after their first treatment, with continued improvements in collagen production and skin quality developing over the following weeks and months. Maintenance treatments every 3–6 months are recommended to maintain results.

RECOVERY TIME

Most clients experience redness and warmth similar to mild sunburn for 24–48 hours following treatment. Mild dryness, sensitivity, or flaking may occur during the healing process. Makeup and physical activity is generally avoided for the first 24 hours, and diligent sun protection is essential while the skin recovers.

To help you achieve the best possible results, your clinician will guide you through any required aftercare before your treatment and you will be given aftercare products to aid healing after every treatment. Comprehensive aftercare information can also be provided ahead of your appointment if desired.
