Vascular Laser.

Vascular Laser Treatments use the advanced Cutera Excel V+ laser to target visible blood vessels, diffuse redness, rosacea, broken capillaries, and vascular lesions. The laser energy is absorbed by the blood vessels, causing them to coagulate and be naturally cleared by the body's lymphatic system. This treatment helps restore a clearer, more even complexion while reducing redness and inflammation with minimal downtime.

BENEFITS

Improves overall skin tone and texture

Reduces redness and facial flushing

Targets broken capillaries and stubborn vascular lesions

Stimulates collagen and elastin production

Recommended *Treatment Plan.*

Treatments are customised based on the severity of redness, rosacea, or vascular concerns. For general facial redness and rosacea, a minimum of 3 treatments spaced 4-6 weeks apart is typically recommended for noticeable improvement. Results continue to develop as the treated vessels are naturally broken down and cleared by the body over the following weeks.

Maintenance treatments may be recommended periodically, particularly for rosacea-prone skin or recurring vascular concerns, to help maintain results.

RECOVERY TIME

Clients may experience redness, swelling, or pinpoint bruising in the treated area. These effects are temporary and can last up to 24-48 hours, depending on the treatment settings and area treated. In some cases, facial puffiness and bruising can last up to a week. It is important to avoid excessive sun exposure 2 weeks before and 2 weeks after treatment and avoid strenuous exercise and heat based activities for at least 24 hours after treatment.

To help you achieve the best possible results, your clinician will guide you through any required aftercare before your treatment. Comprehensive aftercare information can also be provided ahead of your appointment if desired.
